Source: Census of India's Houselisting and Housing Census Data Highlights - 2011 (figures in %)

This table has been edited to correct an error in earlier versions which suggested the number of households with (1) latrine facilities connected to a piped sewer system and (2) with no drainage system were 11.9 per cent and 48.9 per cent respectively of households with a latrine facility inside the house. In fact, these numbers are a percentage of all households.
