Word of the day

Consumerism

Consumerism is a concept in which people in a particular community give utmost priority to buying and owning goods. In a society driven by consumerism, material possessions determine an individual or a group's socio-economic status. When an economy is built on the principles of consumerism, every individual's spending becomes the driving force of the economy. However, this lifestyle has a range of drawbacks such as increased loans, debts, longer working hours and over-use of products. Consumerism promotes the shift from a need-based to a want-based society.

Activity: Use the word of the day in a sentence
