

The Delhi Network of Positive People

Dear Mr. Broun,

My colleague Mr. Loon Gangte sent you a letter yesterday regarding stock out of lopinavir/ritonavir syrup in India. I want to reiterate that this is a huge concern for the Indian HIV community. We have been told by officials in Cipla that we should ensure payment for any future procurement of the medicine from Cipla. I would like to tell you that the community is in no position to do so. We can neither force the government nor donors like the Global Fund. But at the end of the day, we are the ones who are hit by these shortages and stock-outs. Anyway we had inquired NACO of timely payment when we met them last week.

Yesterday 600+ community members, including children living with HIV (CLHIV) appealed to the Prime Minister, Finance Minister and Health Minister highlighting their distress and pleading for a solution. I hope you too will look into the matter and sort out the problem so that these children can live.

I am reproducing the letter by Mr. Gangte and the letter by HIV community to the PM below for your kind reference;

Dear Dr. Hamied, Mr. Vohra. Mr. Kartalis, Mr. Broun,

Over the years we have watched Cipla produce TRIOMUNE the first affordable ARV FDC, challenge the patent on the cancer drug imatinib and other essential ARVs in the last decade. Cipla as a generic manufacturer has played a critical role in ensuring the supply of life saving medicines to millions of PLHIVs in the developing world.

Today we are writing to you regarding a matter that impacts nearly a thousand vulnerable infants and young children. Their treatment with PI based ART has been put at risk with the non availability of the lopinavir ritonavir paediatric formulation. The National AIDS Control programme has already issued instruction to break adult tablets - the consequences of which we know from experience could be inappropriate dosing and non adherence.

The formulation in the form of syrup or pellet of lopinavir/ritonavir cannot be sourced by the ART programme as Cipla is the sole producer and has taken the decision to not supply the programme and even to shut down production of the syrup.

Cipla as the sole supplier has a special responsibility to ensure not only exports to other countries to who source the drug from India but also to ensure that HIV+ infants and children live to grow up and lead a normal life.

We are aware that Cipla has the capacity to re-instate the production of the syrup or to supply the substitute lopinavir/ritonavir pellet to the national ART programme. We request you to immediately take all possible steps to provide immediate stocks to the national programme and set by a dialogue with the Global Fund and Dr. Arun Panda (Jt Secretary NACO) to resolve the issue of funds needed for the procurement.

Children living with HIV have appealed to the Prime Minister to investigate the issue and look into your concerns regarding delayed payments.

We hope Cipla will act responsibly and ethically to take speedy action to save the lives of the HIV+ infants and young children in India.

Loon Gangte

People Against Medicine Stock- Outs

To,

Prime Minister Narendra Modi Prime Ministers' Office South Block New Delhi – 110 001	Finance Minister Arun Jaitley North Block, New Delhi, 110001	Health Minister J P Nadda Room No. 344, A Wing, Nirman Bhawan, Maulana Azad Marg New Delhi 110011
--	--	--

Date: March 3, 2017

Developing a proactive approach to the prevention of HIV medicines shortages

Dear Prime Minister Modi, Minister Jaitley and Minister Nadda,

Shortages of medicines have been a global problem for the past decade and have also increasingly affected the National AIDS Control Programme in India. We, as people living with HIV, have consistently worked together with the national programme to address shortages and stock outs as it is our community which faces delayed or interrupted treatment, increasing the risk of developing resistance to their current regimen.

We would like to draw your attention to the recent stock out of an essential HIV medicine – lopinavir/ritonavir for infants and young children – which has occurred as the sole company manufacturing the life-saving formulation is not participating in the bids that NACO invites.

The pharmaceutical company Cipla has in various forums cited delay in payments by the national programme for the HIV medicines by several years and even non-payment of its dues in many cases. Profits on child doses of HIV medicines are small and delayed payments is having a chilling effect on the ability of NACO to convince the company to participate in the bids it invited annually.

Further, the lack of prioritisation by the Central Drugs Standard Control Organisation (CDSCO) to provide permission to bioequivalence studies and register new child friendly fixed dose combination formulations of HIV medicines is also impacting the availability of essential paediatric medicines to the HIV programme in the country.

The Delhi Network of Positive People

Paediatric AIDS is a neglected disease and few manufacturers globally come forward to produce child doses of HIV medicines. Indian generic manufacturers however have consistently invested in developing child doses and are now exporting heat stable pellets of lopinavir/ritonavir. They are also taking forward the R&D for an innovative 4 in 1 fixed dose combination of HIV medicines that will greatly simplify treatment for infants and children.

Procurement of medicines needs to be timely and so do the payments by the government for the medicines that companies supply to NACO.

Procurement and supply chain reforms for pharmaceuticals led by the Health Ministry are taking a long time. We humbly request you to in the meantime look into the matter of HIV drug stock out in general and in particular paediatric HIV medicines to ensure that they are not merely exported but also actually available to the children in this country.

Sincerely,

Rakesh Mohan

(I was born with HIV and I am alive today because of anti-retroviral therapy by the government).

Please find below CLHIVs and PLHIVs who endorse the letter.
